

LEGO Animal Hospital Challenge

Materials needed:

Legos!

Or, use wood blocks, construction paper, and other household materials

Activity Plan:

- Using only 18 LEGO bricks, build an animal hospital or veterinary center.
- Can this hospital treat magical creatures, real animals, or both?
- Can the animal hospital be adapted to make room for more beds, to take care of more animals? Can it be adapted to take care of people?
- Make up a story about the veterinarians who care for the animals in your hospital. When did they realize they wanted to be caregivers for animals?
- When you're done, take pictures of your veterinary center and write a description of what you know about your animals and their doctors, and send to your teacher.
